I just wanted to share with you the great experience I had working with Martin Sheridan at DigiBeans. He was very professional and prompt with all interactions. We were able to deliver an animated video for my client in time for his launch. We all know that video is critical, and having a resource like this is a great opportunity to leverage our clients. My client is in the cybersecurity space, and his offering is somewhat complex. He was reluctant to get in front of the camera himself - perfect setup. I HIGHLY recommend DigiBeans and will use them in the future. My client was so happy!

I have been using DigiBeans for 9 months for a B2C client and could not be happier with the results (site traffic up 76% over prior year). The communication and quality of work by the DigiBeans team has been great- very responsive and flexible when needed. I would definitely recommend Martin and team!

“Exceeded our expectations”, “They got it right the first time” are direct quotes from one of my clients. Martin and the Digibeans team were a pleasure to work with from start to end. I highly recommend their services, so pleased with the quality of the animation video they developed. I look forward to working with Digibeans soon.

Worked with Martin and the Digibeans team on a couple of projects now. Quality of the work is always excellent. Communication is proactive and clear and I like the collaborative nature of the work - not just order takers but a real interest in ensuring the final product does what you want it to do.

Martin and his team at Digibeans are fantastic. They provide great quality work vs. other production centers I tried for website builds and SEO. I use Digibeans for the majority of my website builds because they take the initiative to get things done. I also like that they offer starter packages for certain things to get going with clients at an entry-level price. I enjoy the opportunity to collaborate with Martin on a peer to peer basis regarding client marketing strategy. I think that Digibeans is the best production center available for helping ICs with sales enablement. Martin provides clear pricing, easy to understand and detailed proposals plus great examples of the deliverables. I feel that Martin often goes above and beyond to deliver for me and I appreciate his efforts.

Digibeans helped us rework a home page for an existing client. The theme was outdated and problematic. Digibeans was able to rework the existing page so that it looked professional and reflected the quality of the client's business. We will work with Digibeans again in the future.

I have used Digibeans to provide SEO services on three client projects to-date. Digibeans have been helpful, transparent and very professional. The detailed bespoke proposals which Digibeans provides promptly and free of charge, have been very useful to close the sales. The proposals also include a detailed schedule of all the relevant SEO activities that they will carry out each month and provide timely periodic reports to confirm that the activities have been implemented. Martin is also very understanding of client issues and has been flexible to help resolve them.

We have used DigiBeans for various videos over many years as well as an e-commerce website and a non-e-commerce WordPress website. You can rely on Martin and his team, you are in safe hands!

They are not expensive for what they provide, which is high end quality work, completed on time. The service and quality cannot be questioned.

As an IC located in a specific language region (Greece), I am extremely happy to have had the opportunity to work with DigiBeans.

Starting back in 2015 with the request of quotations, very quickly I discovered a superb level of professionalism and detail orientation approach to our complete satisfaction. Effective 2017 we began working on various projects (video, SEO) and to this day Digi Beans has met our expectations at all levels (turnaround, quality, value)

Subject: Testimonial

Hi Martin,

Just a short note to thank you and your team for great support and service over the past months. We have used Digibeans on several of our SEO / Adaptive SEO projects and in each case, we have seen substantial improvements in our client's rankings, traffic and social signals.

We have been with WSI for coming up to 10 years and have used quite a few SEO providers, including many of the 'big names' in the WSI E-Marketplace. I can honestly say that Digibeans is head and shoulders above any of the other SEO suppliers and would happily give both a verbal and written testimonial to any IC who may ask you for one.

Lesley and myself look forward to continuing working with you in the future.

Kind regards,

Chris

Subject: DigiBeans Testimonial

DigiBeans Testimonial

We have worked with Digibeans on one of our key SEO projects. There are a few points that make Digibeans stand out to us when compared to other SEO suppliers within the WSI marketplace:

- The expertise within the team is obvious. Advice is quick, clear and actionable.
- The content they provide has been imaginative, well written, well presented and in an amazing array of media.
- Any issues are dealt with quickly and professionally
- Reports are well presented and timeous.

Results have been very impressive, with 60% rise in organic traffic in 12 months.

I wouldn't hesitate to recommend Digibeans as an SEO supplier.

Regards

Mel Gard

Subject: DigiBeans Testimonial

Over the past couple of years, I have used a variety of Digibeans SEO and Digital Marketing services with a number of my long-standing clients.

Every quotation is provided with a full end client proposal which summarises everything that will be delivered for the end client. I find this very helpful in removing the 'smoke and mirrors' fallacy of SEO, and building trust as it gives my client full visibility of the tasks being undertaken, including explanatory notes on each item's relevance to the SEO process.

This visibility follows through into the reporting where comprehensive activity reports are provided to clients, including evidence such as screen shots and URLs.

My clients appreciate the robustness of Digibeans' approval processes that ensures all content is approved by them before it is used. Similarly, full login details for all accounts opened and used on behalf of the client are documented and shared with the client, enabling the client to continue to use them after the specific project has finished.

My clients appreciate this transparency - they know exactly what is included in the service they have purchased and are presented with the evidence as those tasks are completed. I am happy with the service delivered by Digibeans to my clients and have recommended Martin and his team to other ICs.

Best regards,
Andy
